Final Project

COS 521 Due: 1/14/2003
Fall 2002
Tarjan

Write a short paper describing an open problem in the area of the design and analysis of combinatorial algorithms and data structures, *not* one of the open problems I have mentioned in class. You should include a discussion of known results and related work. Optionally, you might also propose possible approaches to the problem. The length of your paper should be 5-10 pages. For ideas, you may wish to consult recent proceedings of conferences in the area, such as the Symposium on Discrete Algorithms, the Symposium on Theory of Computing, the Symposium on Foundations of Computer Science, and the European Symposium on Algorithms.
