

Tracing NestedCircles.java

Put your PDF application into “presentation” or
“full-screen” mode to view.

<http://www.cs.princeton.edu/courses/archive/fall17/cos126/precepts/NestedCircles.java>

```
void draw(int n, double x, double y, double radius){  
    if (n == 0) return;  
    fancyCircle(x, y, radius);  
    double halfRadius = radius/2;  
    // recursively draw two nested circles order n-1  
    draw(n-1, x - halfRadius, y, halfRadius);  
    draw(n-1, x + halfRadius, y, halfRadius)  
}  
  
public static void main(String[] args) {  
    int n = Integer.parseInt(args[0]);  
    double x = 0.5, y = 0.5;  
    draw(n, x, y, 0.5);  
}
```

everything is in relation to the current level n
with a center of (x, y)

draw(int n, double x, double y, double radius)

if (n==0) return; ← base case (stop at 0)

fancyCircle(x, y, radius); ← DRAW current circle in center

double halfRadius = radius/2; ← Half the radius

draw(n-1, x - halfRadius, y, halfRadius); ← smaller circle
to left

draw(n-1, x + halfRadius, y, halfRadius); ← smaller circle
to right

Let's trace.....

1

```
draw(2, 1/2, 1/2, 1/2)
  if (n == 0) return;
  fancyCircle(x, y, radius);
  double halfRadius = radius/2;
  draw(n-1, x - halfRadius, y, halfRadius);
  draw(n-1, x + halfRadius, y, halfRadius);
```

StdDraw

1

draw:
n=2, x= 1/2, y=1/2, radius=1/2

1

```
draw(2, 1/2, 1/2, 1/2)
if (n == 0) return;
fancyCircle(x, y, radius);
double halfRadius = radius/2;
draw(n-1, x - halfRadius, y, halfRadius);
draw(n-1, x + halfRadius, y, halfRadius);
```

The green outline indicates the current statement.

StdDraw

1

draw:
n=2, x= 1/2, y=1/2, radius=1/2

1

```
draw(2, 1/2, 1/2, 1/2)
  if (n == 0) return;
  fancyCircle(x, y, radius);
  double halfRadius = radius/2;
  draw(n-1, x - halfRadius, y, halfRadius);
  draw(n-1, x + halfRadius, y, halfRadius);
```

The number indicates the sequence of method calls.

1

draw:
n=2, x= 1/2, y=1/2, radius=1/2

StdDraw

1

```
draw(2, 1/2, 1/2, 1/2)
  if (n == 0) return;
  fancyCircle(x, y, radius);
  double halfRadius = radius/2;
  draw(n-1, x - halfRadius, y, halfRadius);
  draw(n-1, x + halfRadius, y, halfRadius);
```

The frame or environment of the method. Similar to what the Java Visualizer displays. Also similar to what is shown in the example in Lecture 6A, Slide 7.

StdDraw

1

draw:
n=2, x= 1/2, y=1/2, radius=1/2

1

```
draw(2, 1/2, 1/2, 1/2)
