

# Global Illumination

COS 526: Advanced Computer Graphics

# Global Illumination

Synthesize image of a 3D scene accounting for all light transport (including indirect illumination)

# Path Types

Ray tracing

*Henrik Wann Jensen*

# Path Types

# Rendering Methods – Path Types

- OpenGL
  - LDE
- Ray tracing
  - LDS\*E
- Path tracing
  - L(D|S)\*E
- Radiosity
  - LD\*E

# OpenGL

$$L_o(x', \bar{\omega}') = L_e(x', \bar{\omega}') + \int_{\Omega} f_r(x', \bar{\omega}, \bar{\omega}') L_i(x', \bar{\omega}) (\bar{\omega} \cdot \bar{n}) d\bar{\omega}$$

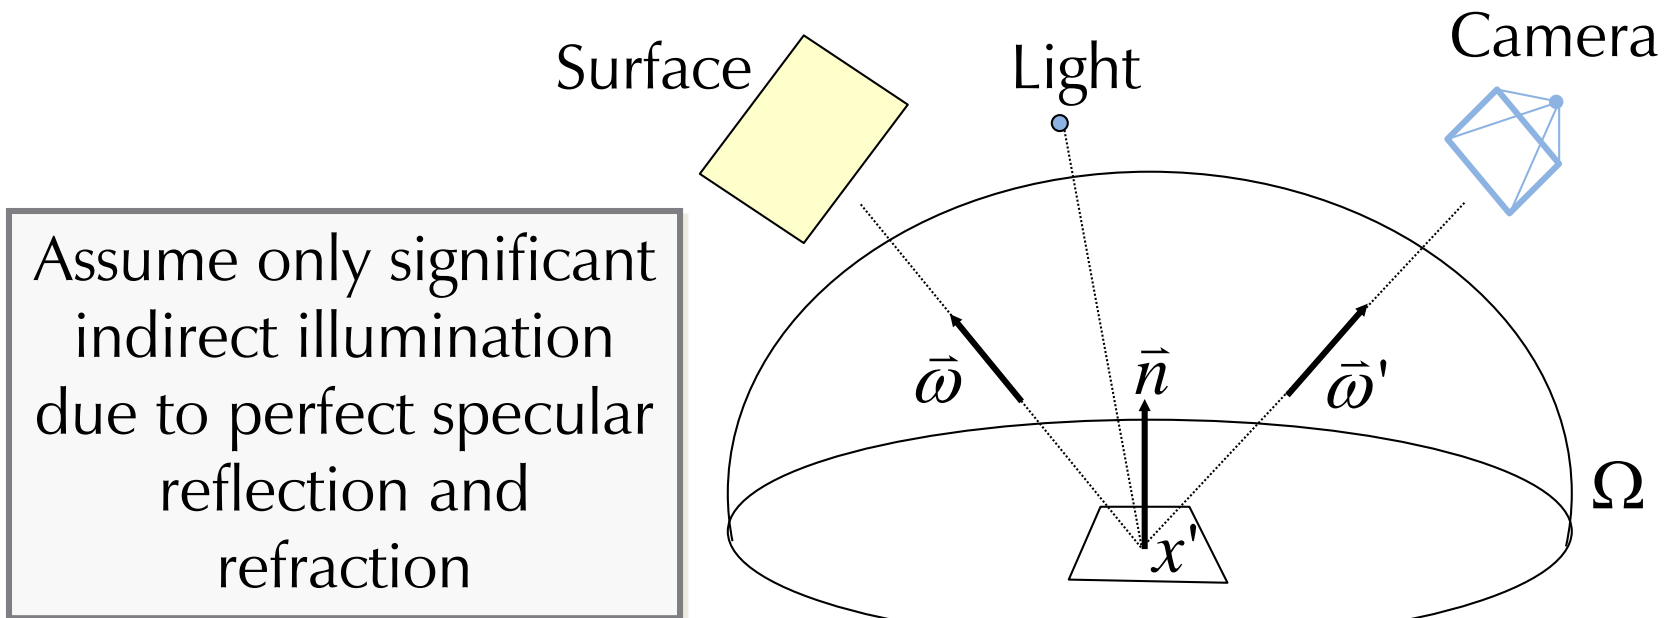

Assume  
direct illumination  
from point lights  
and ignore visibility

$$L_o(x', \bar{\omega}') = L_e(x', \bar{\omega}') + \sum_{i=1}^{nlights} f_r(x', \bar{\omega}, \bar{\omega}') L_i(x', \bar{\omega}) (\bar{\omega} \cdot \bar{n})$$

# Recursive Ray Tracing

$$L_o(x', \bar{\omega}') = L_e(x', \bar{\omega}') + \int_{\Omega} f_r(x', \bar{\omega}, \bar{\omega}') L_i(x', \bar{\omega}) (\bar{\omega} \cdot \bar{n}) d\bar{\omega}$$

$$L_o(x', \bar{\omega}') = L_e(x', \bar{\omega}') + \sum_{i=1}^{nlights} f_r(x', \bar{\omega}, \bar{\omega}') L_i(x', \bar{\omega}) (\bar{\omega} \cdot \bar{n}) + specular$$

# Distribution Ray Tracing

$$L_o(x', \bar{\omega}') = L_e(x', \bar{\omega}') + \int_{\Omega} f_r(x', \bar{\omega}, \bar{\omega}') L_i(x', \bar{\omega}) (\bar{\omega} \cdot \bar{n}) d\bar{\omega}$$

Estimate integral  
for each reflection  
by random sampling

Also:

- Depth of field
- Motion blur
- etc.

# Path Tracing

$$L_o(x', \bar{\omega}') = L_e(x', \bar{\omega}') + \int_{\Omega} f_r(x', \bar{\omega}, \bar{\omega}') L_i(x', \bar{\omega}) (\bar{\omega} \cdot \bar{n}) d\bar{\omega}$$

# Path Tracing

Estimate integral for each pixel by sampling paths from the camera

# Ray Tracing vs. Path Tracing

Ray tracing

Path tracing

# Bidirectional Path Tracing

- Role of source and receiver can be switched, flux does not change

# Bidirectional Path Tracing

# Tracing From Eye

# Tracing from Lights

# Bidirectional Path Tracing

# Bidirectional Path Tracing

(RenderPark 98)

# Summary
