

COS 522 Complexity - Spring 2007 - Final Take Home Exam

- Read these instructions carefully *before* starting to work on the exam. If any of them are not clear, please email me before you start to work on the exam.
- **Schedule:** You can work on this exam in a period of 48 hours of your choice between May 7th to **May 21st 10:00am**. You should type up your exam (preferably using L^AT_EX) and email it to me by May 21st 10:00 am. *This is a strict deadline.* You may submit the exam earlier. In addition, please submit a hardcopy of the exam to my mailbox.
- **Restrictions , honor code:** You should work on the exam alone. You can use your notes from the class, the homework exercises and their solutions, the textbook and the handouts I gave in class. You can also use any personal summaries and notes of the material that you prepare before starting to work on the exam. *You should not use any other material while solving this exam.* You should write and sign the honor pledge on the hardcopy of the submitted exam (the pledge is “I pledge my honor that I did not violate the honor code during this exam and followed all instructions”).
- **Writing:** You should answer all questions *fully, clearly and precisely.* When describing an algorithm or protocol, state clearly what are the inputs, operation, outputs, and running time. When writing a proof, provide clear statements of the theorem you are proving and any intermediate lemmas or claims.
- **Partial solutions:** If there is a question you can not solve fully, but you can solve a partial/relaxed version or a special case, then please state clearly what is the special case that you can solve, and the solution for this case. You will be given partial credit for such solutions, as long as I feel that this special case captures a significant part of the question’s spirit.
- **Quoting results:** You can quote without proof standard mathematical tools such as Chernoff bounds, and concepts from linear algebra (inner product, eigenvalues etc.). However, you should quote the results precisely, and give a reference to the place in the textbook where the result is stated.
- **Clarifications:** I have made an effort to make the questions as clear and unambiguous as possible. In case any clarifications are needed, I will try to be always available by email. You can also email me with your number and good times to call, and I will call you back. If you need me more urgently, you can call me at my cell phone 917-674-6110 between 10am and 10pm eastern time. If there are any unresolved doubts, please write your confusion as part of the answer and maybe you will get partial credit.
