We currently have the following opportunity available at our Princeton, New Jersey facility.

Principal Engineer I

EDUCATION REQUIREMENTS: As a Principal Engineer I, you will need a BS/MS degree in an engineering or scientific discipline with a minimum of 12 years experience or a Ph.D. with 6-7 years experience. You will have extensive specialized knowledge in at least one area of applications engineering, an intermediate knowledge of other supported areas of applications engineering and a working knowledge of other areas within the department (Biomedical, Mechanical, Technical).

POSITION DESCRIPTION: In this position, you will initiate and lead the development of complex systems in support of research goals. Such systems may include components of software, microcontrollers, electronic interfaces, circuit board design and fabrication, data acquisition and analysis. You will provide designs for modifications of existing research equipment or creation of new equipment to provide required capabilities for scientists. You will ensure the interfaces or automation systems software perform properly and safely by observation, compliance testing, user/vendor consultation, repair, and follow-up evaluation and analysis. You will develop the test and fabrication equipment inventory, the technical library and assist in project documentation and ensure the specification, purchase and maintenance of adequate materials, tools, components, parts, spare devices, and software components. You will assist supervision in administrative duties including but not limited to vendor service procurement, documentation, and departmental GLP and FDA compliance matters. You will direct the maintenance and assist in the development of required hardware and provide backup coverage for other areas of the department.

We offer extensive training and mentoring, a competitive compensation package and professional development programs. For consideration, please forward your resume to:
