

1

Clipping

Lee Markosian
(covering for Adam Finkelstein)
Princeton University
COS 426, Fall 2001

2

3D Rendering Pipeline (for direct illumination)

3

3D Rendering Pipeline (for direct illumination)

4

2D Rendering Pipeline

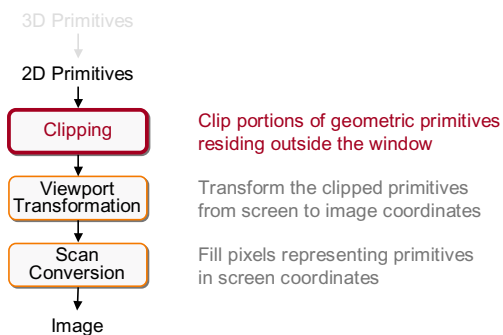

Clip portions of geometric primitives residing outside the window

Transform the clipped primitives from screen to image coordinates

Fill pixels representing primitives in screen coordinates

5

2D Rendering Pipeline

6

Clipping

- Avoid drawing parts of primitives outside window
 - Window defines part of scene being viewed
 - Must draw geometric primitives only inside window

Screen Coordinates

Clipping

7

- Avoid drawing parts of primitives outside window
 - Window defines part of scene being viewed
 - Must draw geometric primitives only inside window

Clipping

8

- Avoid drawing parts of primitives outside window
 - Points
 - Lines
 - Polygons
 - Circles
 - etc.

Point Clipping

9

- Is point (x,y) inside the clip window?

```
inside =  
(x >= wx1) &&  
(x <= wx2) &&  
(y >= wy1) &&  
(y <= wy2);
```

Line Clipping

10

- Find the part of a line inside the clip window

Line Clipping

11

- Find the part of a line inside the clip window

Cohen Sutherland Line Clipping

12

- Use simple tests to classify easy cases first

Cohen Sutherland Line Clipping

13

- Classify some lines quickly by AND of bit codes representing regions of two endpoints (must be 0)

Cohen Sutherland Line Clipping

14

- Classify some lines quickly by AND of bit codes representing regions of two endpoints (must be 0)

Cohen Sutherland Line Clipping

15

- Classify some lines quickly by AND of bit codes representing regions of two endpoints (must be 0)

Cohen Sutherland Line Clipping

16

- Classify some lines quickly by AND of bit codes representing regions of two endpoints (must be 0)

Cohen-Sutherland Line Clipping

17

- Compute interesections with window boundary for lines that can't be classified quickly

Cohen-Sutherland Line Clipping

18

- Compute interesections with window boundary for lines that can't be classified quickly

Cohen-Sutherland Line Clipping

19

- Compute interesections with window boundary for lines that can't be classified quickly

Cohen-Sutherland Line Clipping

20

- Compute interesections with window boundary for lines that can't be classified quickly

Cohen-Sutherland Line Clipping

21

- Compute interesections with window boundary for lines that can't be classified quickly

Cohen-Sutherland Line Clipping

22

- Compute interesections with window boundary for lines that can't be classified quickly

Cohen-Sutherland Line Clipping

23

- Compute interesections with window boundary for lines that can't be classified quickly

Cohen-Sutherland Line Clipping

24

- Compute interesections with window boundary for lines that can't be classified quickly

Cohen-Sutherland Line Clipping

25

- Compute interesections with window boundary for lines that can't be classified quickly

Cohen-Sutherland Line Clipping

26

- Compute interesections with window boundary for lines that can't be classified quickly

Cohen-Sutherland Line Clipping

27

- Compute interesections with window boundary for lines that can't be classified quickly

Cohen-Sutherland Line Clipping

28

- Compute interesections with window boundary for lines that can't be classified quickly

Cohen-Sutherland Line Clipping

29

- Compute interesections with window boundary for lines that can't be classified quickly

Cohen-Sutherland Line Clipping

30

- Compute interesections with window boundary for lines that can't be classified quickly

Cohen-Sutherland Line Clipping

31

- Compute intersections with window boundary for lines that can't be classified quickly

Clipping

32

- Avoid drawing parts of primitives outside window
 - o Points
 - o Lines
 - o Polygons
 - o Circles
 - o etc.

Polygon Clipping

33

- Find the part of a polygon inside the clip window?

Polygon Clipping

34

- Find the part of a polygon inside the clip window?

Sutherland Hodgeman Clipping

35

- Clip to each window boundary one at a time

Sutherland Hodgeman Clipping

36

- Clip to each window boundary one at a time

Sutherland Hodgeman Clipping 37

- Clip to each window boundary one at a time

Sutherland Hodgeman Clipping 38

- Clip to each window boundary one at a time

Sutherland Hodgeman Clipping 39

- Clip to each window boundary one at a time

Clipping to a Boundary 40

- Do inside test for each point in sequence, Insert new points when cross window boundary, Remove points outside window boundary

Clipping to a Boundary 41

- Do inside test for each point in sequence, Insert new points when cross window boundary, Remove points outside window boundary

Clipping to a Boundary 42

- Do inside test for each point in sequence, Insert new points when cross window boundary, Remove points outside window boundary

Clipping to a Boundary

43

- Do inside test for each point in sequence, Insert new points when cross window boundary, Remove points outside window boundary

Clipping to a Boundary

44

- Do inside test for each point in sequence, Insert new points when cross window boundary, Remove points outside window boundary

Clipping to a Boundary

45

- Do inside test for each point in sequence, Insert new points when cross window boundary, Remove points outside window boundary

Clipping to a Boundary

46

- Do inside test for each point in sequence, Insert new points when cross window boundary, Remove points outside window boundary

Clipping to a Boundary

47

- Do inside test for each point in sequence, Insert new points when cross window boundary, Remove points outside window boundary

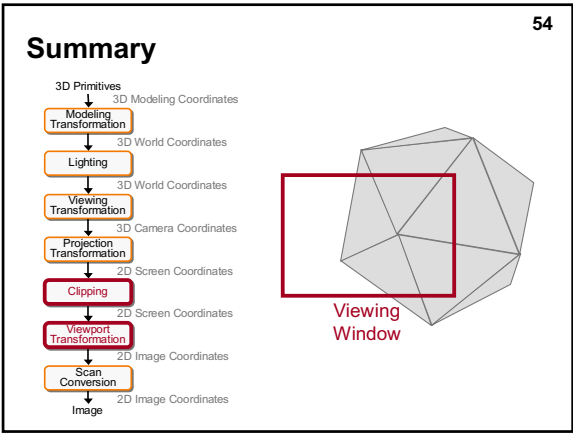

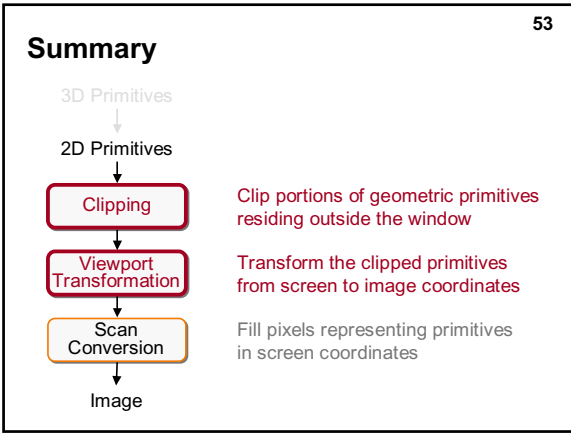

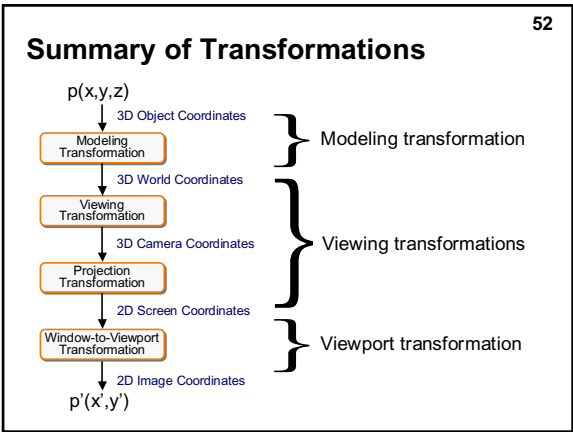

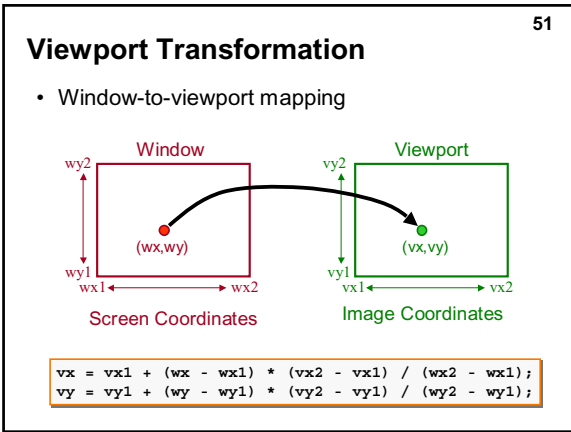

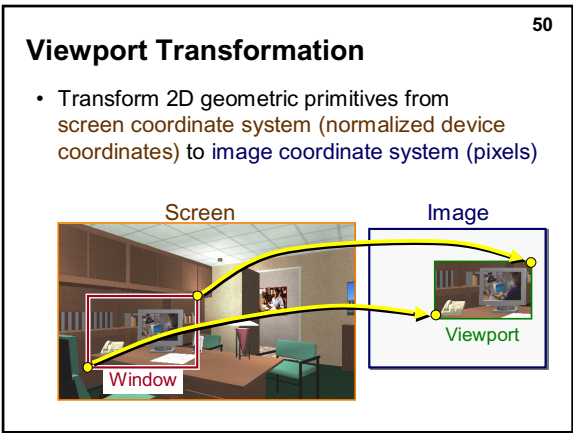

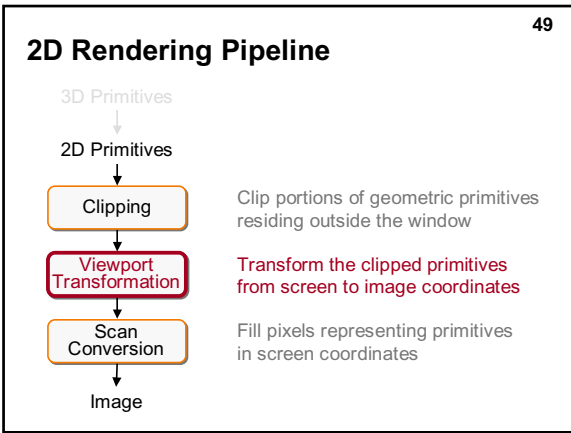

Clipping to a Boundary

48

- Do inside test for each point in sequence, Insert new points when cross window boundary, Remove points outside window boundary
