 Blogging Assignment 3

Post on blog by Tuesday, March 28, at 1:30pm

Write 250 words on **one** of the following two topics. Your contribution will be graded based upon the degree to which it reflects a good understanding of lecture material and/or an original viewpoint. Obviously, the word limitation necessitates picking and choosing between many things you could write about. As usual, you should keep the style informal.

1. Turing machines (a.k.a. Turing-Post programs) and what you learnt from studying them.

2. Boolean logic, its uses and limitations (what kinds of reasoning does it not lend itself to?) and its connection to Boolean circuits and modern computers.
