

COS IW04: Hands-on Deep Learning for Language Understanding

Spring 2022

Today: Proposal Presentation

1. Ashley Teng
2. Jacqueline He
3. Connie Xu
4. Caroline Di Vittorio
5. Aatmik Gupta
6. Sahil Ambardekar
7. Zachary Lopez
8. George Toumbas
9. Kenny Lam
10. Brendan Wang

7 minutes each person!

Compute Resources

- SEAS Funding deadline: this Friday (February 11) **←— You don't have to apply it now**
- Alternatively, we have applied **\$300 Microsoft Azure Credits** for everyone and you should get them this week (hopefully)
 - 👍 No need to wait
 - 👍 You can get multiple GPUs to use
 - 👍 We can probably get more credits for you later if needed
 - 🙅 The setup is slightly more complicated than Colab (Jacqueline will post a “get started” guide later this week)
- You can still apply for SEAS Funding if 1) you need funding for Amazon Mechanical Turk or purchasing a dataset license; 2) Colab Pro — Expect a delay though!

Next week

- Seminar meeting:
 - Project updates - I expect that everyone should at least start to “get your hands dirty” and explore your datasets/code base that you are going to build on
 - Come with your initial exploration and questions!
- Submit your proposal to IW portal by 17th (next Thursday)
