

GETTING STARTED: COMPUTER SCIENCE INDEPENDENT WORK

SPRING 2026

**DR. ROBERT FISH, DR. DAVID AUGUST,
& MIKKI HORNSTEIN**

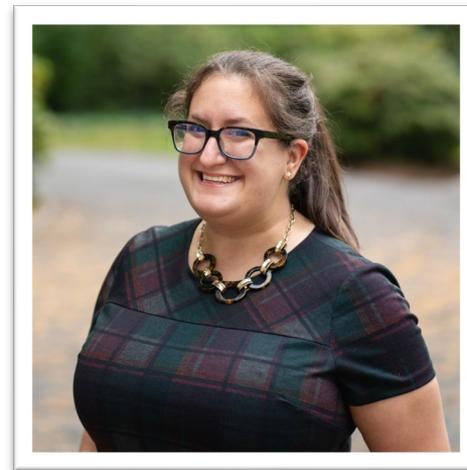

WELCOME!

Robert Fish
IW Coordinator
rfish (@cs.princeton.edu)
037 Corwin Hall

David August
IW Coordinator
august (@cs.princeton.edu)
221 Computer Science

Mikki Hornstein
IW Administrator
mhornstein (@princeton.edu)
212 Computer Science

OUTLINE FOR THIS SESSION

- Outstanding IW Awards – Fall 2025
- Overview of independent work in Computer Science
- Details of important steps and deadlines
- Resources for more information and help

CONGRATULATIONS!

Exemplary Fall 2025 Independent Work

Jeremy Bao, BSE'27

Calibrating Reasoning Models to Know When They Don't Know

Adviser: Anirudha Majamdar

Stefan Gjaja, BSE'26

prompt.ly: Prompt better, think better.

Adviser: Robert Fish

Diya Hundiwala, BSE'27

AnchorNote: Exploring Gesture- and Speech-Based Spatial Sticky Notes for Collaboration in Augmented Reality

Adviser: Andrés Monroy-Hernández

Abdur-Raheem Idowu, BSE'26

On the Practicality of Real-World Wi-Fi-Based Video Fingerprinting

Adviser: Maria Apostolaki

Ivan Amado Krsul Portugal, BSE'26

Handlebar: A Platform for Ethical Mobile Screen Data Research

Adviser: Andrés Monroy-Hernández

Rafael Moschopoulos, BSE'27

STU-NO: Solving Partial Differential Equations with Spectral Filtering

Adviser: Elad Hazan

Addison Wu, BSE'27

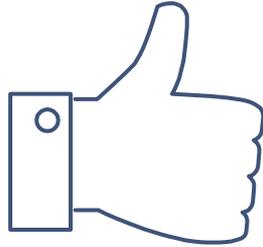

Are Large Language Models Sensitive to the Motives Behind Communication?

Adviser: Tom Griffiths

Annika Yeh, BSE'26

Deep Learning for Archival Aerial Photography: Mapping Long-Term Socioenvironmental Change in Namibia

Adviser: Xiaoyan Li

**LET'S GET
STARTED!**

What Is Independent Work?

■ Independent Work (IW):

An individual project to study an idea in depth.

■ Examples:

- ▷ Algorithm
- ▷ System design
- ▷ Problem formulation
- ▷ Benchmark suite
- ▷ Proof of a theorem
- ▷ Application
- ▷ Investigate a dataset
- ▷ Etc...

Why Do Independent Work?

- Study a topic in depth
 - ▷ Dive into much more detail than is possible in a course
- Learn important skills
 - ▷ Technical writing, speaking, project management
- Work closely with faculty
 - ▷ Meet weekly, get advice, get to know them, etc.
- Do something interesting to talk about in...
 - ▷ Grad applications, job interviews, etc.
- Have fun!!

Types of Independent Work, Spring

■ Spring Term Project

- ▶ All AB juniors and some BSE juniors/seniors.
- ▶ Designed for one term, but can be followed by a related project in a later term.
- ▶ IW seminar, or one-on-one/individual advising.

IW Seminars

- Same as one-on-one projects, but students work on related topics and meet with an advisor together.
 - ▶ Enables collaborative projects.
 - ▶ Enables sharing of infrastructure.
 - ▶ Enables feedback to/from other students.
- Targeted at first-time IW students
 - ▶ Provides more help on how to choose good projects, how to manage time, how to design talks, how to write papers, etc.

Important Steps and Deadlines: Spring 2026 Projects

- February 12: Written Project Proposal due in IW portal, 11:59pm
- February 13: SEAS online IW/thesis funding application due, 5:00pm
- March 5: Checkpoint Form due, 11:59pm
- March 17: Attend How to Give an IW Talk information session
- March 24: Attend How to Write an IW Paper information session
- April 12: Oral Presentation Slides & Link to Video due in IW portal, 11:59pm
- April 26: Written Final Report due in IW portal, 11:59pm

QUESTIONS SO FAR?

**Onto the
specifics...**

Written Project Proposals

- Submit a written description of your project plan
- Logistics:
 - ▷ Due February 12, 11:59pm Eastern
 - ▷ 1-2 page paper
 - ▷ Submit PDF document via IW portal

Written Project Proposal (Continued)

■ Motivation and goal

- ▷ “The goal of my project is...”

■ Related work

- ▷ Survey of prior work with similar goals

■ Approach

- ▷ Key novel idea

■ Implementation plan

- ▷ Things you plan to implement

■ Evaluation Plan

- ▷ Experiment design, data, metrics, comparisons

Checkpoint Form

- Write a short summary of what is done in the first half, and what is planned for the second half
- Logistics:
 - ▷ Due March 5, 11:59pm EDT
 - ▷ Write two-three paragraphs
 - ▷ Submit via IW portal
 - ▷ Get feedback from advisor

Checkpoint Form - Comp. X

https://iw.cs.princeton.edu/portal/student/submissions/229/checkpoint

Checkpoint Form

Please refer to [independent work website](#) for more information about this form.

Name*

Advisor*

Project title*

Approximate number of meetings with your advisor*

Progress report*

Progress to date: ← **Progress to date:**

Current difficulties: ← **Current difficulties:**

Next steps: ← **Next steps:**

Submit

Oral Presentation

(Spring-Term IW Students Only)

- Give a **nine-minute** talk about what you've done over the whole term.
- Logistics:
 - ▶ Attend “How to Give an IW Talk” on March 17.
 - ▶ Submit slides and video link via IW portal by April 12 at 11:59pm.
 - ▶ Note: You must submit your FULL slide deck by the deadline above.

Oral Presentation (Continued)

- Video-recorded oral presentations
 - ▶ Record your oral presentation via Zoom, or
 - ▶ Select another way to record your oral presentation (Loom, etc.)
- Save your recording either on Zoom or in Google Drive
 - ▶ Submit a **link** to your recording to the IW portal
- Submit a pdf of your slides to the IW portal
- Seminar students: your instructor may ask you to practice or present in your group meeting, as well
- One-on-one students: your adviser may ask you to present to their research group, as well

Oral Presentation (Continued)

- Motivation and goal
 - ▷ “The goal of my project is...”
- Related work
 - ▷ Survey of prior work with similar goals
- Approach
 - ▷ Key novel idea
- Implementation plan
 - ▷ Things you implemented. How did you do it? What remains to be done?
- Evaluation
 - ▷ Experiment design, data, metrics, comparisons, qualitative results, quantitative results, further results needed
- Discussion
 - ▷ Conclusions, limitations, future work

Written Final Report

- Submit a written description of your project, including results and conclusions

Logistics

- Due April 26 by 11:59pm
- Attend “How to Write an IW Paper” on March 24
- Submit PDF via IW portal
- 20-25 pages, double-spaced, plus appendix

Final papers submitted after 11:59pm on the due date will be assigned a 1/3 grade deduction.

Written Final Report (Continued)

Motivation and goal

- ▷ “The goal of my project is...”

Related work

- ▷ Survey of prior work with similar goals

Approach

- ▷ Key novel idea

Implementation

- ▷ Things you built. How did you do it? ~~What remains to be done?~~

Evaluation

- ▷ Experiment design, data, metrics, comparisons, qualitative results, quantitative results, ~~further results needed~~

Discussion

- ▷ Conclusions, limitations, future work

Additional Important Information

Manage your independent work

Spring 2026

Advisor August, David

Written Proposal → [Submit File](#) 
Due: 2/12/2026 11:59 pm

Checkpoint Form → [Click to complete form](#)
Due: 2026-03-05

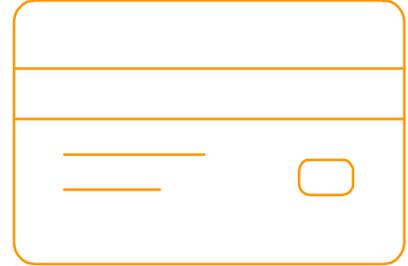

Oral Presentation Slides → [Submit File](#)
Due: 4/12/2026 11:59 pm

Oral Presentation Video Link → [Click to complete form](#)
Due: 4/12/2026 11:59 pm

Written Final Report → [Submit File](#)
Due: 4/26/2026 11:59 pm

Funding

Project-related expenses:

- ▶ Unusual hardware, software, data sets, etc.

Available funds:

- ▶ School of Engineering and Applied Science: Application due February 13 by 5:00pm
 - ▶ Requires an adviser signature, **don't procrastinate!**
 - ▶ Support up to ~\$500 or more with justification (\$300 max for cloud computing services. Again, more with justification.)
 - ▶ Open to ANY computer science student
- ▶ Student Activities Funding Engine (SAFE)
 - ▶ <http://www.princeton.edu/studentfunding>

Collaboration

■ INDEPENDENT Work

- ▶ **Every student must do their own project**

■ Collaboration

- ▶ Multiple IW projects can be synergistically part of a larger effort, either with other IW students, or grad students
- ▶ Each student must carve out a distinct part with a clear goal, novel idea, evaluation methodology, etc.
- ▶ Each student must submit their own work
- ▶ Each student will be graded separately

Grading

- **IW must be taken for a grade.**
- Grades are recommended by instructor, confirmed by IW Coordinators

- Grades will depend upon:
 - ▶ Student initiative and contribution: the creativity and originality of student ideas and/or degree of technical challenge undertaken
 - ▶ Student progress: content, amount of work accomplished to date, clarity and polish of presentations
 - ▶ Student presentation and paper: content, eloquence, organization and clarity

Grading (Continued)

- Majority of grade will depend upon quality of work and presentation.
 - ▶ Poor presentation and/or missing checkpoints will also have an impact.
- **Final papers submitted after 11:59pm on the due date will be assigned a 1/3 grade deduction.**

Grading (Continued)

A-level

- ▶ Clear contribution – interesting, creative
- ▶ Solid execution and results – refined and tested
- ▶ Excellent talks, papers – thoughtful, thorough
- ▶ Student has taken initiative and led project

B-level

- ▶ Not-so-innovative – possibly obvious from previous work
- ▶ Working execution and results – not fully refined and tested
- ▶ Complete papers and talks – limited insights

Grading (Continued)

■ C-level

- ▶ Not innovative
- ▶ Unfinished or not working implementation
- ▶ Report looks like workbook or lab report

■ D-level

- ▶ Nothing interesting attempted, nothing gained
- ▶ Report is stream of consciousness

Common Mistakes

- ⊘ Mistake: Delaying project planning until last minute.
 - ▷ Instead: Get started right away.
- ⊘ Mistake: Postponing meetings with your advisor.
 - ▷ Instead: Try to meet once a week, even if it's a brief meeting.
- ⊘ Mistake: Allowing yourself to get stuck.
 - ▷ Instead: Talk to your advisor; don't avoid them when you are stuck.
 - ▷ TAs are usually assigned to every seminar. Use them!

Common Mistakes (Continued)

- ⊘ Mistake: Putting off work until the end of the term.
 - ▶ Instead: Work consistently during the term (10 hours per week, minimum).

- ⊘ Mistake: Preparing papers and presentations at the last minute.
 - ▶ Instead: Iteratively refine. Get feedback from your advisor.

If You're Having Trouble...

Examples:

- ▶ If you expect to miss a deadline
- ▶ If you have problems with your advisor
- ▶ If you have problems with your project
- ▶ Other factors in your life (e.g. illness, death in the family, etc.)

If you tell us early, we might be able to help you

- ▶ We can direct you to the right person

Fixing problems post facto may be much harder

- ▶ Often involves Deans, etc.

A large, light blue speech bubble with an orange outline, containing the text 'LET US KNOW!' in bold, dark blue capital letters.

**LET US
KNOW!**

Who/What You Can Ask

■ Your Advisor:

- ▶ Anything research related
- ▶ Not: “Can I skip the project proposal or final paper?”

■ IW Coordinators (Dr. Fish, Dr. August)

- ▶ Anything about mandatory requirements
- ▶ Not: “Is this research interesting?”

■ IW Administrator (Mikki Hornstein)

- ▶ Anything about dates, forms, funding, etc.
- ▶ Not: “Can you give me an extension?”

❓ How to Ask Questions

■ Canvas/Ed – Primary Resource

- ▶ <https://edstem.org/us/courses/94936/discussion>
- ▶ Ask IW staff and other students questions about logistics, advice, toolkits, data sets, etc.

■ Email Mikki

- ▶ mhornstein (@princeton.edu)

Where to Find More Information

IW Website:

- ▶ <https://www.cs.princeton.edu/ugrad/independent-work-thesis>
- ▶ Calendar and Requirements

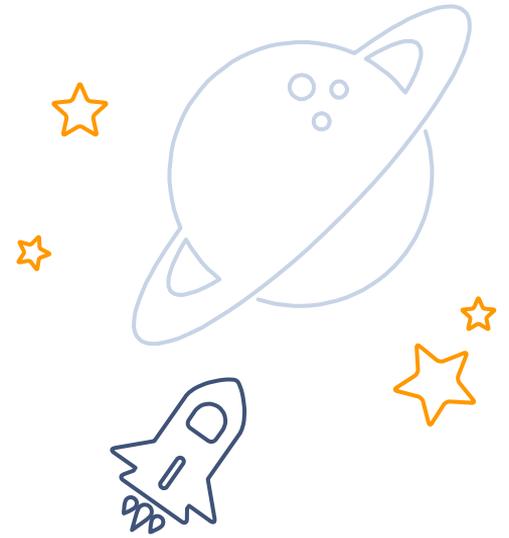

IW Handbooks:

- ▶ AB Handbook: https://csguide.cs.princeton.edu/sites/default/files/2025-08/COS_AB_IW_Handbook_2025-26.pdf
- ▶ BSE Handbook: https://csguide.cs.princeton.edu/sites/default/files/2025-08/COS_BSE_IW_Handbook_2025-26.pdf

Note: These slides will also be available on the website and Canvas

That pretty much covers it.

Let's summarize the key points...

Immediate Next Steps

- Look over the IW website, IW handbooks, and be aware of important upcoming deadlines.
- One-on-one students: Schedule weekly meetings with your advisor.
- Seminar students: Attend your seminar meetings.

What to Do in January/February?

- Work diligently to develop your project plan.
 - ▷ Work hard to define a specific goal.
 - ▷ Understand all related work.
 - ▷ Articulate what makes your project novel.
 - ▷ Know what software and data you will use.
 - ▷ Have a good idea of what you need to implement.
 - ▷ Have a specific plan to evaluate your results.
- Write your project proposal early, get feedback, and refine multiple times.

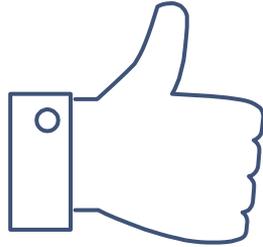

But the Term Just Started!

- The first few weeks are really important...
 - ▶ A good project plan is key to success.
 - ▶ It takes time to understand related work, relevant software, and available data sets.
 - ▶ It takes iteration and refinement (multiple meetings with your advisor) to define a good project goal and novel approach.
 - ▶ Working hard in the first few weeks greatly reduces the chances of ending up with a weak project.

My Thoughts on IW at Princeton

- This is your chance to do an in-depth project on a novel topic of your own choosing.
 - ▶ It doesn't get better than this.
 - ▶ It's probably why you came to Princeton.
 - ▶ It's certainly what you'll remember most from your academic career at Princeton.
- Take the initiative and **BE AWESOME!**

THANKS!

Any questions?
