Submission guidelines for COS 426 assignments

Or how to let your TAs let you enjoy your life

Remove unnecessary files

- MSVC
  - Clean Solution
  - Remove **all** Debug and Release directories in src and subdirectories
  - Remove **all** ipch directories
  - Remove .sdf file in the src directory
- Linux and Mac - terminal
  - cd src
  - make clean
  - cd ../..
  - rm –r __MACOSX (only some people have it)

Naming and directory tree

- Rename the **root** directory of your submission:
  - NetID_cos426_assignmentX
    - Where X – respective assignment number
    - NetID – your NetID
- Your root directory should contain:
  - **src**, **input**, **output**, and **art** directories
  - All **Makefiles** necessary to build your code and get your results
  - Your **writeup.html** – make sure it points to existing results

Compressing to .zip file

- Windows
  - Right-click the **root** folder, point to **Send To**, and then click **Compressed (zipped) Folder**
- Mac and Linux

  zip -9 -r studentID_cos426_assignmentX.zip studentID_cos426_assignmentX

Not sure? Verify!
